Brighter Community Planning & Consulting Ltd.

Brighter Community Planning & Consulting is a dynamic, dedicated resourceful, and dependable company. Often development projects that seem simple are in fact complex. BCP navigates our clients along the best customized path to help them achieve their goals.

Led by owner Chrystal Fuller, LPP, MCIP, a licensed professional planner with over 20 years' experience in planning. She has served clients throughout Nunavut and the Maritimes. Although most of her life has been spent in Nova Scotia, Canada's North holds a special place in her heart, especially Nunavut where she spent almost six years.

Chrystal and her team are experienced in all avenues of municipal planning, land-use planning, facilitation, community development and engagement. Brighter Community Planning has developed a strong portfolio working for various levels of government, local business, private citizens, and large corporations. Our team includes Professional Planners, Engagement experts, GIS specialists, and we are growing all the time.

Brighter Community Planning & Consulting takes a proactive approach with:

- Economic development support and project feasibility analysis for land development approvals
- Community engagement and facilitation
- Municipal planning and approvals
- Housing research and policy development
- General Plan and Land Use bylaw reviews
- Land use planning
- Community engagement for the mining sector in support of federal and provincial environmental review processes.

CBCL

Solutions Today | Tomorrow IN Mind is CBCL's promise.

As an employee-owned firm, we are committed to creating a positive and lasting impact on people and our planet by providing world-class multidisciplinary engineering and environmental consulting services.

Since 1955, CBCL has focused on making meaningful global contributions. With experience in over 100 countries, our multi-talented team creates innovative solutions for our clients that positively shape tomorrow.

CBCL has 12 offices in five provinces. Our diverse team of over 400 employees is committed to providing technical excellence and exceptional service. We consider the short and long-term social, environmental, and sustainable effectiveness of every project. Our teams deliver over 1,500 projects a year in multiple sectors, including: Bridges, Buildings, Coastal, Climate Resilience, Environmental, Geotechnical, Industrial, Municipal, Ports & Marine, Sustainability, Transportation, and Water.

While CBCL's roots are in Atlantic Canada, we have extensive experience and knowledge to plan, prepare, and work in remote communities and project locations. We have experience working with over 30 Indigenous communities providing a variety of engineering and environmental services to meet diverse localized needs. We build collaborative relationships with community stakeholders to develop local solutions that meet provincial, federal, and territorial standards. We are particularly proud of having worked to remove several long-standing drinking water advisories in a number of different communities including Miawpukek First Nation, NL; Mushuau (Natuashish) Innu First Nation, NL; and Potlotek First Nation, NS. Most recently, CBCL has provided Design and Project Management services, along with Construction Administration services for the development of a Small Craft Harbour in Clyde River, Nunavut. Along with Canadrill, CBCL's joint venture partner, the Team's approach to provide a successful design for this project was to work closely and collaboratively with all stakeholders and ensure all climate elements and structural considerations were well modelled and studied.

MacGregors Industrial Group

MacGregors Industrial Group is a provider of turnkey infrastructure solutions for the mining, telecommunications, power generation, and construction industries. We carry our clients through initial design, construction, and installation, as well as providing ongoing life cycle maintenance and operational support over the life of a project. We understand that logistics can make or break a supply relationship in the Arctic climate, which is why we have dedicated logistics support staff assigned to every project we undertake. A tradition of quality and exceptional customer service has helped us become a leader in the markets we serve throughout North America and beyond.

A listing of MacGregors services and products:

- Community Freezer / Cold Storage Buildings / Fish and Community Food Processing Buildings
- Prefabricated buildings for the telecommunications, mining, and energy distribution sectors
- Maintenance garages, operations, and administrative support buildings
- Telecommunications equipment infrastructure
- Structural steel fabrication
- Machining services and wear part refurbishment programs for mining companies
- Mining conveyors, aggregate equipment, and industrial metal products
- Industrial supply and sourcing services (i.e., industrial fasteners, hydraulic components) for remote hamlets and municipalities

NEXUS Coastal Resource Management Ltd.

NEXUS Coastal Resource Management Ltd. (NEXUS) is an environmental resource management company based in Halifax, Nova Scotia. NEXUS provides expert research and technical advisory services to develop plans, policies, and strategies that support the sustainable management, use, and development of natural resources.

The NEXUS Team works in the social and political intersection of community, academia, government, and industry to promote sustainable economic development based on sound resource management. We offer the following primary services:

- Design and implement objective-based and project-specific stakeholder and community engagement plans and activities.
- Facilitate online and in-person engagement approaches that promote constructive two-way dialogue, collaborative decision-making, and facilitate social licence.
- Analyze and evaluate project-specific regulatory and social challenges and opportunities.
- Develop resource management plans, policies, and strategies.
- Conduct socio-economic and environmental impact assessments.
- Conduct marine and environmental policy research and analysis and regulatory review.
- Research, analyze, and prepare climate change adaptation plans.
- Negotiate and mediate mutually acceptable community benefits agreements.
- Work with communities to conduct traditional and Indigenous knowledge studies.
- Design and develop user-friendly and accessible interactive data visualization tools.
- Develop and deliver academic courses in fisheries, resource management, Indigenous rights, and engagement.

PISCES RESEARCH PROJECT MANAGEMENT INC.

Pisces Research Project Management Inc.

Pisces Research Project Management Inc. is a research and development project management company passionate about making the greatest positive impact for your ocean research, money, and time. Our vision is to shape the future of oceans by supporting visionary ideas.

We are committed to creating positive, true, and mutually beneficial collaborations. Our team of ocean experts have worked in multiple sectors and do our best work when supporting projects at the intersection of two or more sectors. We love to help your ocean projects, workshops, proposals, data management, finances, and more!

People do their best work when they are doing the work they enjoy most. At Pisces RPM, we maintain honest, transparent, and fun relationships, and bring these principles to our project management services to give researchers and businesses back their time.

Need a little help? *Pisces RPM is here to assist you throughout your ocean projects, or just when you need a little extra support at a particular stage.*

"The Pisces RPM team were invaluable in organizing and managing our recent workshops. They did an excellent job moderating a dynamic group of Arctic and Northern researchers, and individuals from government and Indigenous organizations. They provided a detailed report of the workshop outcomes that encompassed the diverse nature of the workshops. The Pisces team were wonderful collaborators and brought ArcticNet's vision and goals to life through this project. We look forward to collaborating again in the future!"

Stantec Consulting Ltd.

We're active members of the communities we serve. That's why at Stantec, we always design with community in mind. The Stantec community unites approximately 26,000 employees working in over 400 locations across 6 continents. We collaborate across disciplines and industries to bring environmental, buildings, energy and resource, and infrastructure projects to life. Stantec is one of the largest environmental consulting firms in Canada, with a long history of providing environmental engineering and consulting services to Federal, Territorial, Municipal and Private Sector clients in the north.

We understand the importance of local context, which is why Stantec has a fulltime, permanently staffed office in Iqaluit and since 2006 has partnered with Inuit as Nunami Stantec (Nunami) to form a majority Inuit-owned consulting company based in Rankin Inlet. Our local strength, knowledge, and relationships, coupled with our world-class environmental expertise, have allowed us to go anywhere to meet our clients' needs in more creative and personalized ways. With a long-term commitment to the people and places we serve, Stantec has the unique ability to connect to projects on a personal level and advance the quality of life in communities across the globe.

Northern Canada is a unique, challenging region for environmental work. Severe weather, remote locations, high operating costs, and changing climate all represent a considerable challenge in the process. We bring with us, more than 35 years of experience in the Northern regions of Canada, established offices in the territories, and an unwavering commitment to building your project and the community it supports.

Bernie MacIsaac

Bernie MacIsaac spent close to 25 years in Nunavut, working in various roles with multiple levels of government, as well as Inuit organizations. Most recently, as the Assistant Deputy Minister and then Deputy Minister for Nunavut's Department of Economic Development and Transportation, from 2014-2018 and 2018-2020 respectfully, he was responsible for the Territory's Business Development Portfolio.

Bernie has a comprehensive understanding of Nunavut's business environment as well as strong relationships with key business owners and operators across the Territory. He has worked closely with the Baffin Regional Chamber of Commerce and Nunavut business development organizations to identify and connect Nunavut companies and people with common business interests, complementary services, expertise, technologies, and business strengths in other parts of the country and around the world.
